

App Specification Document

App Name: FOV Ministry Secretariat

Platform:

- Mobile: Android
 - Admin Dashboard: Web and Android
-

1. Purpose of the App

The app is designed to help church secretariat members manage and complete all preparations required before church services. It will ensure that all departments complete their assigned tasks on time through reminders and progress tracking.

2. Problem Statement

Currently, there is no structured system to track whether all departments have completed their tasks before services. This leads to:

- Missed responsibilities
 - Poor coordination
 - Last-minute rush and confusion
-

3. Solution Overview

The app will:

- Send reminders to users to complete assigned tasks
 - Allow users to confirm task completion
 - Provide a system to track progress across departments
 - Enable administrators to monitor and generate reports
-

4. Key Features

4.1 User Accounts

- Users will register with:
 - Username
 - Password
 - Department selection
 - Each user will only access their assigned department
 - Role-based access:
 - **Users (Secretariat members)**
 - **Administrator**
-

4.2 Departments & Task Checklist

Each department will have a checklist with **Yes/No options and a comment section**:

1. Admin

- Have announcements been compiled?
- Has the convener been notified?

2. Media

- Has the poster been shared on social media?
- Is everything set for live streaming?

3. Equipment

- Is the generator in usable condition and fueled?
- Is the projector available and working properly?

4. Music

- Are all musical instruments available?
- Are all band members available?

5. Prayers

- Has the intercession leader been notified?

6. Welfare

- Are refreshments and towels ready?
- Is bottled water available for the front row?

4.3 Task Submission

- Users will:
 - Select **Yes/No** for each task
 - Add optional comments
 - Submit their checklist

4.4 Notifications

- Automated reminder messages:
 - **Days:** Wednesday and Saturday
 - **Time:** 3:00 PM
- Message content:
"Please go to FOV Ministry Secretariat App to update your checklist for tomorrow's service."
- Admin can optionally send custom notifications

4.5 Admin Dashboard

Administrator will have full control, including:

- View all department submissions
- Monitor task completion status
- Generate reports in:

- PDF
 - JPG/Image format
 - Add or remove users
 - Send notifications to users
-

5. Technical Requirements

6. Expected Outcome

- Improved coordination across departments
 - Timely completion of tasks
 - Better communication within the ministry
 - Clear reporting and accountability
-

7. Notes

- The system should be simple and easy to use
- UI should be clean and mobile-friendly
- Future upgrades (optional): SMS reminders, analytics dashboard
