PROFESSIONAL PROFILE

Full-Stack Software Engineer with hands-on experience developing secure, scalable web and mobile applications using **TypeScript, JavaScript, React, Laravel, Flutter, PostgreSQL (Supabase), MySQL, Firebase, and RESTful APIs**. Experienced in designing responsive user interfaces, backend services, authentication systems, relational databases, and cloud-based applications.

Beyond software development, I have contributed to digital transformation initiatives through my internship at Seeds of Promise, where I improved organizational reporting, content management, digital communication, and workflow efficiency.

I enjoy solving real-world problems through clean, maintainable code and continuously learning modern technologies. I am seeking an opportunity to contribute to a collaborative engineering team where I can build reliable software while growing as a Full-Stack Engineer.

TECHNICAL SKILLS

Languages

- TypeScript
- JavaScript (ES6+)
- PHP
- Python
- Java
- Dart
- C
- C++

Frontend

- React

- HTML5
- CSS3
- Tailwind CSS
- Bootstrap

Backend

- Laravel
- REST API Development
- Authentication & Authorization
- Role-Based Access Control (RBAC)

Mobile

- Flutter
- Android (Java/XML)

Databases

- PostgreSQL
- Supabase
- MySQL
- Firebase Firestore
- SQLite

Development Tools

- Git
- GitHub
- Postman
- VS Code
- Android Studio
- Figma
- XAMPP

Additional Skills

- Software Architecture
- Database Design
- API Integration
- Responsive UI Development
- Agile Development
- Technical Documentation
- Debugging & Testing
- Version Control

PROFESSIONAL EXPERIENCE

Communication & Digital Systems Intern

Seeds of Promise | September 2025 – Present

Supported the organization's digital transformation initiatives by combining communication, technology, and information management to improve operational efficiency.

Key Responsibilities

- Designed and published digital content across multiple platforms.
- Developed newsletters using Mailchimp for partners and donors.
- Built digital data collection systems using Google Forms.
- Organized and digitized monthly departmental reports.
- Managed cloud-based document organization using Google Drive.
- Produced promotional graphics, banners, posters, and marketing materials.
- Captured and edited professional event photography and videos.
- Collaborated with multiple departments to improve communication workflows.
- Supported fundraising campaigns through digital marketing and storytelling.
- Assisted in documentation, reporting, and knowledge management.

Technologies & Tools

Mailchimp • Google Workspace • Canva • CapCut • Microsoft Office

SOFTWARE ENGINEERING PROJECTS

UniConnect MW (Final Year Project)

Full-Stack Student Employment Platform

Designed and developed a platform connecting university students with employers offering internships, part-time jobs, freelance work, and career opportunities.

Responsibilities

- Designed application architecture.
- Built secure authentication system.
- Developed role-based access control.
- Created employer and student dashboards.
- Implemented job posting and application workflows.
- Developed profile management features.
- Designed relational database structures.
- Integrated scheduling functionality.
- Built responsive user interfaces.
- Connected frontend components with backend APIs.

Technologies

TypeScript • React • Laravel • REST APIs • MySQL • Tailwind CSS

FOV Mini

Flutter Mobile Application

Migrated the application's backend infrastructure from Firebase to Supabase to improve scalability and leverage PostgreSQL.

Responsibilities

- Migrated authentication system.
- Configured PostgreSQL database.
- Connected Flutter application to Supabase.
- Integrated RESTful APIs.
- Implemented user management.
- Performed testing and debugging.

Technologies

Flutter • Dart • Supabase • PostgreSQL • Firebase

Chapel Attendance System

Designed and developed a biometric attendance management solution for Daeyang University.

Features

- Fingerprint authentication
- Attendance management
- Reporting dashboard
- Student records management
- Secure database integration

Technologies

Java • MySQL • Android

Personal Portfolio Website

Designed and developed a responsive portfolio website showcasing technical skills, software projects, and professional experience.

Technologies

HTML • CSS • JavaScript • Tailwind CSS

EDUCATION

Daeyang University

Bachelor of Information & Communication Technology

Major: Software Engineering

Expected Graduation: 2026

ACHIEVEMENTS

- Successfully migrated a production mobile application's backend from Firebase to Supabase.
- Developed multiple full-stack academic and personal software projects.
- Supported digital transformation initiatives for a growing nonprofit organization.
- Produced professional digital campaigns, reports, and communication materials for international partners.

LEADERSHIP & COMMUNITY ENGAGEMENT

Seeds of Promise

Contributed to initiatives focused on:

- Youth empowerment
- Digital communication
- Community development
- Entrepreneurship
- Education
- Organizational storytelling
